-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22 and 24 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Navi.

The engraved surface roller 10 of col. 1, line 15 and col. 2, lines 20-23 reads on the applicator roller. The rubber form friction dry roller of col. 1, line 17 reads on the claimed form roller. Lines 16-17 states that contact for ink transfer is present between the surface roller and the form roller. A baffle 18 having a top 20 is disclosed at col. 40 lines 54 and 60-62. The reverse angle doctor blade 16 defining the front wall of ink reservoir 14 reads on the wiper blade and alignment angle. See col. 2, lines 20-23 and figure 1.

The top 20 of the baffle is above the blade 16 and its line of contact with the applicator roll 10. The rotation of the roller 10 generates a circular flow of ink within the reservoir in parallel with the cylinder 10's rotation. See col. 2, lines 65-69. This reads on maintaining a volume of ink against the applicator roller and on claim 24. Figure 1 shows the downward rotation direction.

Claims 23 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 23 and 25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1-21 stand allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. ***

A shortened statutory period of 3 months is set to respond.

Eickholt/ds

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Any inquiry concerning the specifics of this communication should be directed to Examiner Eickholt, who can be reached Tuesday through Thursday. Inquiries of a general nature should be directed to the TC2800 receptionist.
